Subject: Reuters Query - BP Lake Michigna Spill

Hi Francisco,

Ed McAllister here at Reuters. We are following up on the oil spill from BP's Whiting refinery. Can you give us an update on the response so far today? I didn't see an updated release on the website this morning.

A couple of things"

How much oil was spilled – even a ballpark figure. Some reports saying 10 barrels, others less. Is that about right?

How far has the oil spilled? Beyond the cove?

How is the clean up going this morning?

Any detail much appreciated.

Best, Ed
